**Subject:** request for drainage reports and channel depths immediately above Anzalduas dam (3 - 6 miles)  
**Date:** Saturday, November 16, 2019 1:07:34 PM  
**Importance:** High

---

Good afternoon,

Thank you all for your input. We would like to request copies of the earlier drainage reports that were referenced in the email yesterday. In addition, while there may be some opportunity for us to sound the bottom of the river channel in order to accurately determine the flow capacity local authorities have referred to the IBWC stating that your office may already possess the records for the depths of the river channel in this section immediately upstream from the Anzalduas dam. This would allow us to stay clear of the middle of the river and alleviate any associated concerns.

Please let me know if the requested information is on file and approximately when it might be available.

**Greg Gentsch, P.E.**
