COMMISSION REDUCES AMISTAD DAM RELEASES

The International Boundary and Water Commission, United States and Mexico, continues to reduce the release of floodwaters from Amistad Dam, located at Del Rio, Texas-Ciudad Acuña, Coahuila. On August 18, the Commission will gradually reduce releases from 6400 cubic feet per second (180 cubic meters per second) to 2100 cubic feet per second (60 cubic meters per second). Amistad Reservoir remains slightly above normal conservation capacity and continues to decline slowly.
