For immediate release  
December 1, 2015

### **One Lane to Close at Country Club Road Bridge for Floodgates Repair Dec. 2-3**

**EL PASO, Texas** – A lane detour will be in effect at the bridge that crosses the Rio Grande on Country Club Road during **December 2-3, 2015**, in order to allow the U.S. Section of the International Boundary and Water Commission (USIBWC) to perform repairs to the steel plates over the floodgate that is on the east side of the bridge.

Both directions of travel across the bridge will be maintained throughout the modifications, as the lane detour will only provide work crews the appropriate space to operate in a safe environment.

Only one lane of the road will be closed at any given time.

The steel plates were damaged because of the large amount of vehicle traffic on Country Club Road. The repairs will allow USIBWC to correct the floodgate temporarily until a more permanent solution can be designed and installed.

**For questions regarding the work being performed, please contact Public Affairs Specialist, Mario A. Montes at (915) 832-4794 or [mario.montes@ibwc.com](mailto:mario.montes@ibwc.com).**
