Sally Spener,

I've been listening to all this talk about "The Wall" and D. Trump and it dawned on me that water flows between our two counties, also migrating animals pass between the USA and Mexico. I found your website and it is very interesting. In all the talk about this Wall I've heard no mention of this Treaty, which to me seems extremely important. You might try to have some control over people, but Mother Nature...well, water has a way of doing just what it wants and trying to stop it at the US border and not allowing it to pass, even the President of the United States will find it hard to do.

I was wondering, has anyone asked your department about how they are going to deal with the water flow and this Wall?

Thank you for your time.
